A contract is a financial and legal bond between partner and company. Its existence ensures the opportunity to profit-making from any useful actions from the partner's side. The profit share depends on the value of the contract.

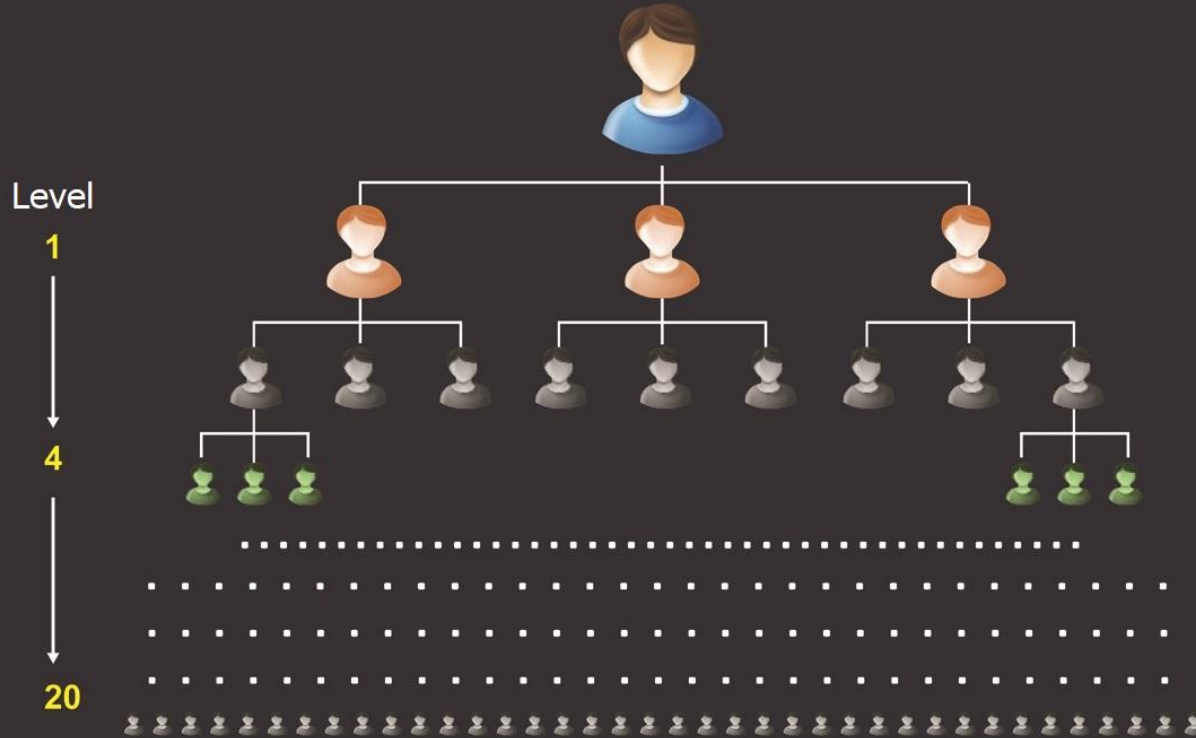

briastorm

Each contract is backed by crypto-assets. It means that each purchased contract will be rewarded with an appropriate amount of tokens and cryptocurrency, such as: Briacoin, ZH Cash, ZH Lite, BrokerCoin, SmmCoin, MERA (tokens of the State Golden Axis) and others derivative tokens.

There is a linear pay system in the Briastorm company.  
And it is 20 levels deep.
